WIMA DC-LINK MKP3

Metallized Polypropylene (PP) -**Capacitors for DC-Link Applications**

Special Features

- Very high volume/capacitance ratio
- Self-healing properties
- With cylindrical plastic case and screw fixing
- Dry construction without electrolyte or oil
- No internel fuse required
- Negative capacitance change versus temperature
- Very low dielectris absorption
- According to RoHS 2011/65/EU
- Customer-specific capacitances or voltages on request

Electrical Data

Capacitance range: $35 \mu F$ to $200 \mu F$ Rated voltages: 700 VDC, 900 VDC, 1100 VDC, 1300 VDC, 1500 VDC

Capacitance tolerances: $\pm 20\%$, $\pm 10\%$, (±5% available subject to special enquiry)

Operating temperature range: -40° C to +85° C

Insulation resistance at +20° C: \geq 5000 sec (M $\Omega \times \mu$ F)

(mean value: 20000 sec)

Measuring voltage: 100 V/1 min.

Dielectric loss factor tan δ_0 : 2 x 10⁻⁴

Test voltage: 1.5 U_r, 2sec Dielectric absorption:

0.05 % **Reliability:**

Operational life > 100 000 hours Failure rate < 50 fit (hot spot ≤ 70° C)

Typical Applications

DC capacitors with high capacitances for applications in power electronics also at non-sinusoidal voltages and currents e.g. in

- Wind power systems
- Inverters

Construction

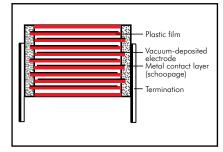

Dielectric:

Polypropylene (PP) film

Capacitor electrodes:

Vacuum-deposited

Internal construction:

Encapsulation:

Solvent-resistant, flame-retardant plastic case with PU-sealing and screw fixing, UL 94 V-0

Terminations:

Screw connection (male or female).

Markina:

Colour: Black. Marking: Gold.

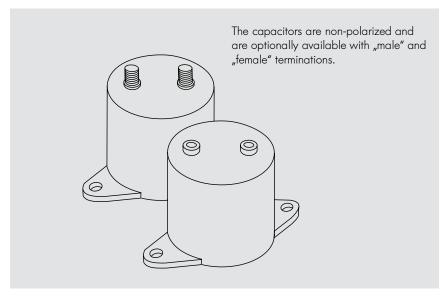

Mounting Recommendation

Excessive mechanical strain, e.g. pressure or shock onto the capacitor body, is to be avoided during mounting and usage of the capacitors.

Packing

Transport-safe packing in cardboard boxes.

For further details and graphs please refer to Technical Information.

WIMA DC-LINK MKP3

WIMA Part Number System

A WIMA part number consists of 18 digits and is composed as follows:

Field 1 - 4: Type description

Field 5 - 6: Rated voltage

Field 7 - 10: Capacitance

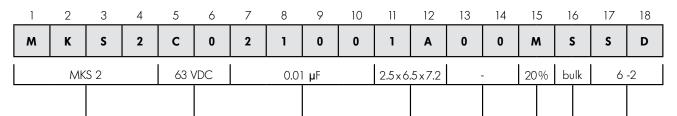

Field 11 - 12: Size and PCM

Field 13 - 14: Version code (e.g. Snubber versions)

Field 15: Capacitance tolerance

Field 16: Packing

Field 17 - 18: Pin length (untaped)
